

```
```javascript
function sendDonationRequest(name, email, amount, message) {
 $.ajax({
 url: 'https://example.com/api/donation-request',
 type: 'POST',
 data: JSON.stringify({
 donorName: name,
 donorEmail: email,
 donationAmount: amount,
 message: message
 }),
 contentType: 'application/json',
 success: function(response) {
 console.log("Donation request sent successfully: ", response);
 },
 error: function(error) {
 console.error("Error sending donation request: ", error);
 }
 });
}
// Usage
sendDonationRequest('John Doe', 'johndoe@example.com', 100, 'I would like
to support your cause.');
```
