

```
```javascript
import axios from 'axios';
const sendLetter = async (letterData) => {
 try {
 const response = await axios.post('https://api.example.com/send-letter',
letterData);
 console.log('Letter sent successfully:', response.data);
 } catch (error) {
 console.error('Error sending letter:', error);
 }
};
const letterData = {
 recipient: 'John Doe',
 address: '123 Main St, Anytown, USA',
 subject: 'Hello!',
 body: 'This is a test letter to say hello.',
};
sendLetter(letterData);
```
```
