

```

```typescript
import axios, { AxiosResponse } from 'axios';
// Define a response type
interface MyResponseType {
 data: string;
 status: number;
 message: string;
}
// Function to make a request
async function fetchData(url: string): Promise<MyResponseType> {
 const response: AxiosResponse<MyResponseType> = await axios.get(url);
 return response.data;
}
// Example usage
fetchData('https://api.example.com/data')
 .then(response => {
 console.log(response);
 })
 .catch(error => {
 console.error('Error fetching data:', error);
 });
```

```
