

```
```javascript
import axios from 'axios';
const url = 'https://api.example.com/endpoint';
const letterData = {
 recipient: 'Recipient Name',
 sender: 'Sender Name',
 subject: 'Subject of the Letter',
 body: 'This is the body of the letter, which contains the main message.'
};
axios.post(url, letterData)
 .then(response => {
 console.log('Letter sent successfully:', response.data);
 })
 .catch(error => {
 console.error('Error sending letter:', error);
 });
```
```
