Subject: DKIM Email Verification Request

Dear [Recipient's Name],

We hope this message finds you well. As part of our commitment to maintaining the security and integrity of our email communications, we are implementing DomainKeys Identified Mail (DKIM) for email verification.

To verify your email and ensure that you are receiving genuine communications from us, please follow the steps below:

1. **DNS Configuration**: Add the DKIM public key to your domain's DNS records. The DKIM selector is `[your-selector]` and the public key is as follows:

```
v=DKIM1; k=rsa; p=[your-public-key]
```

2. **Verification**: Once you have updated your DNS records, please send a test email to [verification email address]. This will help us confirm that the DKIM signature is properly set up.

3. **Confirmation**: After receiving your test email, we will verify the DKIM signature and send you a confirmation of successful setup.

Thank you for your cooperation in enhancing our email security. Should you have any questions or need assistance, please do not hesitate to contact us.

Best regards,

[Your Name]
[Your Position]
[Your Company]
