Subject: DKIM Signing Configuration for [Your Domain Name]

Dear [Recipient's Name],

I hope this message finds you well. I am writing to inform you about the configuration of DKIM (DomainKeys Identified Mail) signing for our domain, [yourdomain.com]. This implementation is essential for enhancing our email authentication and improving deliverability.

DKIM Selector: [yourselector]

Public Key:

```
v=DKIM1; k=rsa; p=[your_public_key]
```

Instructions for DNS Configuration:

1. Log in to your DNS management console.
2. Navigate to the DNS records section for [yourdomain.com].
3. Create a new TXT record with the following details:
 - Name: [yourselector]._domainkey.[yourdomain.com]
 - Type: TXT
 - Value: v=DKIM1; k=rsa; p=[your_public_key]

Testing DKIM Configuration:

After adding the DNS record, please verify the DKIM setup using tools like DKIMCore (https://dkimcore.org/tools/) to ensure proper functioning.

If you have any questions or require further assistance, please do not hesitate to reach out.

Best regards,

[Your Name]
[Your Position]
[Your Company]
