Dear [Recipient's Name],

I hope this letter finds you well. I am writing to discuss the possibility of undergoing family DNA testing. Recently, I have become interested in exploring our family heritage and understanding our genetic background.

The testing could provide valuable insights into our ancestry and help us connect with distant relatives. I believe it may also be beneficial for us to uncover any potential health-related genetic predispositions.

If you are open to the idea, I would love to discuss the process further and consider participating together as a family. Please let me know your thoughts on this.

Thank you for considering this. I look forward to hearing from you soon.

Warm regards,

[Your Name]
