Dear [Recipient's Name],

I hope this letter finds you well. I am writing to discuss the findings of the recent DNA test we conducted.

First and foremost, I want to thank you for your participation and openness throughout this process. It has brought us to some important information that I believe we should review together.

[Insert detailed findings from the DNA test, including any relevant percentages, relatives found, or notable information that was uncovered.]

Given these results, I think it's crucial that we have a conversation about the implications of this information. [Discuss any feelings, next steps, or actions that may need to be taken based on the findings.]

Please let me know a convenient time for you to discuss this further. I am looking forward to hearing your thoughts.

Best regards,

[Your Name]
