

```

```R
library(ggplot2)
Create a sample dataset
data <- data.frame(
 Category = c("A", "B", "C", "D"),
 Values = c(23, 45, 12, 36)
)
Set up the ggplot letter format
ggplot(data, aes(x = Category, y = Values)) +
 geom_bar(stat = "identity", fill = "blue") +
 labs(
 title = "Bar Plot of Categories",
 x = "Category",
 y = "Values"
) +
 theme_minimal() +
 theme(
 plot.title = element_text(hjust = 0.5),
 axis.text.x = element_text(angle = 45, hjust = 1)
)
```

```
