

```
```javascript
$.ajax({
 url: 'your-endpoint-url',
 type: 'POST', // or 'GET'
 data: {
 key1: 'value1',
 key2: 'value2'
 },
 dataType: 'json', // or 'html', 'text', etc.
 success: function(response) {
 // Handle success
 console.log('Success:', response);
 },
 error: function(xhr, status, error) {
 // Handle error
 console.error('Error:', error);
 },
 complete: function(xhr, status) {
 // Code to run regardless of success or failure
 console.log('Request complete:', status);
 }
});
```
```
