Dear [Patient's Name],

I hope this letter finds you well. After reviewing your recent lab results and considering your symptoms, I want to inform you that you have been diagnosed with Lyme disease.

Lyme disease is caused by bacteria transmitted through the bite of infected deer ticks. Symptoms may include fever, headache, fatigue, and a characteristic skin rash. It is essential to begin treatment promptly to manage and alleviate symptoms effectively.

I recommend starting a course of antibiotics, which is typically effective in treating the infection. We will schedule a follow-up appointment in [time frame] to monitor your progress and adjust treatment if necessary.

Please do not hesitate to reach out if you have any questions or concerns regarding your diagnosis or treatment plan. Your health is our priority.

Wishing you a speedy recovery.

Sincerely,

[Your Name]
