

Ad Code Documentation for Nhava Sheva ## Overview This document provides the necessary information for implementing advertising codes specific to Nhava Sheva. ## Ad Code Structure

```
### HTML Template ```html
``` ### JavaScript Implementation ```javascript (function() { var adContainer =
document.getElementById('nhava-sheva-ad'); // Function to load the ad function loadAd() { //
```

Ad fetching logic adContainer.innerHTML = "[+](#)[+](#)"; } // Load the ad on window load
window.onload = loadAd; })(); ``` ## Ad Specifications - **Placement ID**: Unique identifier for each ad placement. - **Size**: Specifies the dimensions of the ad (e.g., 300x250). - **Target URL**: The link to be navigated to when the ad is clicked. - **Alternative Text**: Description of the ad for accessibility purposes. ## Usage Notes - Ensure the dimensions match the allocated space on your web page. - The `targetUrl` should always be valid and lead to a relevant destination. - Test the implementation across different devices and browsers for compatibility.
