

Subject: PXE Server Setup Instructions

Dear Team,

I hope this message finds you well. As part of our ongoing efforts to streamline our deployment process, we will be setting up a PXE (Preboot Execution Environment) server. Below are the necessary steps and details for the setup.

****1. Hardware Requirements:****

- [List of hardware components]
- [Any specific server or network configurations needed]

****2. Software Installation:****

- Install [PXE server software name] on [server name].
- Configure [DHCP/FTP/TFTP] services as required.

****3. Configuration Steps:****

- Configure the DHCP server to point to the PXE server.
- Set up TFTP settings in [configuration file location].
- [Additional configurations, if needed]

****4. Testing:****

- After setup, please test by booting a client machine and checking connectivity to the PXE server.
- Verify that the correct images load successfully.

****5. Documentation:****

- All procedures and credentials are to be documented in [link to documentation].
- Ensure compliance with security protocols throughout the setup.

Please let me know if you have any questions or need assistance during the setup process. Your cooperation is essential for a smooth implementation.

Best,
