

```

```python
class LetterGenerator:
 def __init__(self, sender, recipient, date):
 self.sender = sender
 self.recipient = recipient
 self.date = date
 def generate_letter(self, subject, body):
 letter = f"""
 {self.sender['name']}
 {self.sender['address']}
 {self.sender['city']}, {self.sender['state']} {self.sender['zip']}
 {self.date}
 {self.recipient['name']}
 {self.recipient['address']}
 {self.recipient['city']}, {self.recipient['state']}
 {self.recipient['zip']}
 Dear {self.recipient['name']},
 Subject: {subject}
 {body}
 Sincerely,
 {self.sender['name']}
 """
 return letter
Example usage
sender_info = {
 'name': 'John Doe',
 'address': '123 Main St',
 'city': 'Anytown',
 'state': 'CA',
 'zip': '12345'
}
recipient_info = {
 'name': 'Jane Smith',
 'address': '456 Elm St',
 'city': 'Othertown',
 'state': 'NY',
 'zip': '67890'
}
letter_gen = LetterGenerator(sender_info, recipient_info, 'October 1,
2023')
print(letter_gen.generate_letter('Hello!', 'I hope this letter finds you
well.))
```

```
