```python
from datetime import date
def generate_letter(event_name, event_date, recipient_name, sender_name):
 letter_template = f"""
 {date.today().strftime('%B %d, %Y')}
 Dear {recipient_name},
 I am pleased to invite you to the {event_name} on {event_date}. This
event will be a wonderful opportunity to connect and engage with others
who share your interests.
 We hope you can join us for an exciting day filled with activities and
networking opportunities.
 Best regards,
 {sender_name}
 """
 return letter_template
# Example usage
event_name = "Annual Charity Gala"
event_date = "January 15, 2024"
recipient_name = "John Doe"
sender_name = "Jane Smith"
print(generate_letter(event_name, event_date, recipient_name,
sender_name))
```
