Dear [Recipient's Name],

Subject: Explanation of TB Test Results

I hope this message finds you well. I am writing to provide an explanation of my recent tuberculosis (TB) test results conducted on [date of test].

The test indicated that [briefly describe the result, e.g., "I tested positive for TB infection," or "I tested negative for TB infection."] It is important to understand the implications of this result:

1. **\*\*If Positive\*\***:

- This does not necessarily mean that I have active TB disease. Further evaluation, including [mention any additional tests or evaluations, e.g., chest X-rays, clinical examinations], is required to determine if I have active TB or if it is latent TB infection.

- I will be following up with [name of healthcare provider or facility] for further assessment and possible treatment options.

2. **\*\*If Negative\*\***:

- A negative result indicates that I do not have TB infection at this time. However, it's advised to monitor any potential symptoms and to continue regular screening based on exposure risk.

I appreciate your understanding and support regarding this matter. Should you require additional information or documentation, please feel free to contact me at [your phone number] or [your email address].

Thank you for your attention.

Sincerely,

[Your Name]  
[Your Title/Position, if applicable]
