Dear [Recipient Name],

I hope this letter finds you well. I am writing to inform you about the recent diagnosis of tuberculosis (TB) concerning [Patient's Name], who has been under my care since [Date].

Following a series of diagnostic tests including a [mention any tests conducted, e.g., skin test, chest X-ray, sputum culture], the results confirm that [Patient's Name] has been diagnosed with TB. This condition is caused by the bacterium *Mycobacterium tuberculosis* and primarily affects the lungs, though it can impact other parts of the body as well. The patient will require a treatment plan consisting of [briefly outline the proposed treatment, e.g., specific medications and duration], which is crucial to ensure effective management of the disease and to prevent transmission to others. It is important that adherence to the treatment regimen is strictly followed.

I recommend that [Patient's Name] refrain from attending public gatherings during the initial phase of treatment and ensure proper follow-up appointments to monitor the progress of the treatment. Should you require any additional information or clarification, please feel free to contact me directly at [Your Phone Number] or [Your Email Address]. Thank you for your attention to this important matter.

Sincerely,

[Your Signature (if sending a hard copy)]
