Dear [Patient's Name],

Subject: Information Regarding Your Uveitis Diagnosis

We are writing to provide you with important information about your recent diagnosis of uveitis. Uveitis is an inflammation of the uvea, the middle layer of the eye, which can cause symptoms such as redness, pain, light sensitivity, and blurred vision.

****Understanding Uveitis****

- ****Causes:**** Uveitis can be caused by various factors including infections, autoimmune disorders, or may have no identifiable cause.

- ****Symptoms:**** Common symptoms include eye redness, pain, blurred vision, or floating spots in your vision.

- ****Diagnosis:**** Diagnosis is made through a comprehensive eye exam, and additional tests may be required to determine the underlying cause.

****Treatment Options****

Treatment for uveitis may include:

- ****Medications:**** Corticosteroids to reduce inflammation, as well as immunosuppressive medications if necessary.

- ****Follow-Up Care:**** Regular follow-up appointments to monitor your condition.

****Next Steps****

Please ensure you attend your scheduled follow-up appointments. If you experience any changes in your vision, severe pain, or increased redness, contact our office immediately.

Should you have any questions or concerns regarding your diagnosis or treatment, feel free to reach out to us at [Phone Number] or [Email Address].

Thank you for trusting us with your eye care.

Sincerely,

[Your Name]
