

Dear [Recipient's Name],

I hope this message finds you well. I am writing to share a brief guide on utilizing XQuartz through the command line for those who may need assistance.

XQuartz Command Line Example

To start an XQuartz session from the terminal, you can use the following command:

```
```bash
open -a XQuartz
```
```

Example Usage

1. Launch XQuartz:

```
```bash
open -a XQuartz
```
```

2. Set the display:

```
```bash
export DISPLAY=:0
```
```

3. Run an X application (e.g., xeyes):

```
```bash
xeyes
```
```

Additional Commands

- To check installed X11 applications:

```
```bash
ls /usr/X11/bin
```
```

Feel free to reach out if you have any questions or need further assistance.

Best regards,
